

XM and its Instant Traffic & Weather is the best thing that has happened to radio in several years. I benefit from it's up to date and accurate information everyday. This is something that my local radio stations can not offer. Information on Demand! I pay for this service so no one else should have the right to petition against this competition to free FM radio stations. The quality of this service is not available elsewhere. XM provides a multitude of listening choices at a fair monthly cost. Please reject the NAB's petition 04-160 and support XM!
